BROADCAST CONTENT SCREENING SERVICE SYSTEM AND METHOD

ABSTRACT:

~~The present invention provides a system~~ A method for screening broadcast programming is provided. A viewer is configured to receive broadcast programming and to present the broadcast programming to a user. An interface is configured to receive user input from a user, the user input comprising at least a content of interest start time based on the broadcast programming. A processor is coupled to the interface and configured to store the user input and to generate a screening signal based on the user input. In a particular aspect, a broadcast recorder is coupled to the viewer and configured to store the received broadcast programming.
